CONFIDENTIAL — MARCH 2026

Sanskrit *Intelligence*

Making 10 million manuscripts *alive* for the modern world

Nikhil Vallishayee • GruWorks

THE OPPORTUNITY

Sanskrit's Untapped Intelligence

10M	70%	483Cr	0
MANUSCRIPTS	IN SANSKRIT	GYAN BHARATAM MISSION	COMMERCIAL AI PLAYERS

WHAT EXISTS

- Scanned manuscripts (images, not searchable)
- Isolated NLP tools across 10+ institutions
- Academic databases (4.8M tagged words)
- Government funding (Rs. 483 Crore)

WHAT'S MISSING

- Sound-by-sound analysis engine
- Unified padacheda + grammar verification
- Contextual meaning vectors at scale
- A commercial intelligence platform

> *The corpus is being built. The funding is flowing. What's missing is the brain.*

THE APPLICATIONS

From Corpus to Companion

CORE ENGINE

Padacheda Engine
Sound & word segmentation + grammar verification

Context Vectors
Meaning embeddings across entire literature

Searchable Corpus
Full-text search across all digitized texts

PRODUCTS

Searchable Companion
Interactive word-by-word explorer

Dharma Companion
AI grounded in source texts

Story Engine
Puranic narrative generation

Publishing Engine
Automated book & HTML

API & Embeddings
Intelligence-as-a-service

INSTITUTIONAL VALUE

Manuscript Triage
AI-assisted prioritization for Gyan Bharatam

Cross-Tradition Engine
Vedantic, Yogic, Dharmic referencing

Preservation Intel
Rare textual lineage identification

> *One engine. Many applications. The platform becomes what the institution needs.*

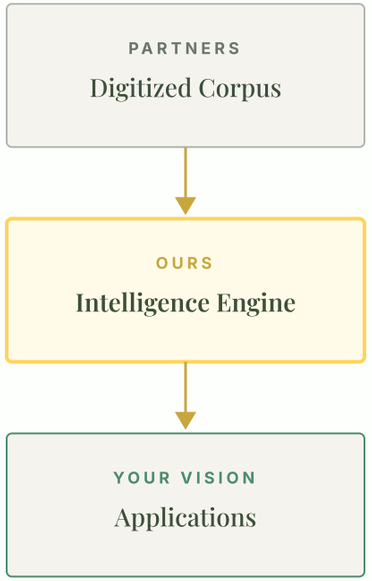
WHO WE ARE

The Team & Approach

NIKHIL VALLISHAYEE — FOUNDER

- **15+ years** in systems engineering, product management, and 0-to-1 building
- **Swiggy** — Designed the aSDE upskilling program: 150+ engineers from Tier II/III cities scaled to production
- **ThoughtWorks, Vedantu, Navi** — Deep tech product across India's top startups
- **Current mission** — AI systems grounded in Indic knowledge architecture (Brahmavidya)
- **DPIIT-recognized** AI startup with working intelligence infrastructure

OUR APPROACH



We don't digitize — that's well underway. We build the **intelligence layer**: reasoning banks, memory systems, prediction engines — already in production.

> *We bridge ancient knowledge architecture with modern AI. This is our core expertise.*

THE INVITATION

Your Vision, Our Infrastructure

Working Engine

Not a concept — intelligence infrastructure already in production

Partnerships

Digitization partners with 20+ year track records in faithful archiving

DPIIT Deep Tech

Government support framework ready to activate for Sanskrit AI

A 30-minute conversation.

The timing is rare: the corpus is funded. AI is recognized as Deep Tech. The tools exist but remain fragmented. What's missing is someone who can **integrate it all into a living platform**.

We believe we can build that — around **your vision**.
